15 MAR 2021 - 1 JUL 2021

Demola - Co-Creation Portugal program - MobC - 4ALL Background

In the last decades there is a clear difficulty in certain areas of the Interior of Portugal in promoting mobility patterns for the resident population, due to the geographical dispersion of the territory and the demographic exodus that has been verified.

It has been difficult for government entities to maintain population mobility patterns that not only respect the environment, but that respect the needs of the population in accessing essential services.

The Candidacy of Guarda, the European Capital of Culture 2027, it is a regional project, promoted by 17 Municipalities.

It aims to develop Beira Interior from its cultural dimension and create conditions for artistic, cultural, social, economic and sustainable development. Aims to fight desertification, correct asymmetries and open doors for everyone.

Challenge

How can we create an efficient, sustainable public transport system that respects the environment and meets people's needs?

Would be possible to develop a service that combining regular, flexible, on-demand, car-sharing transport services and offering everyone the opportunity to access cultural events?
